- Front-End Development: HTML/CSS, JavaScript (ES6), TypeScript,
- Frameworks: React.js, React Native, Redux/Redux Toolkit, Angular
- UI Styling: SCSS/SASS, Material UI, Bootstrap 5, Nativewind
- Version Control: Git, Github, Bitbucket
- Backend Development: Node.js, Express.js,
- Databases: SQL, MySQL, PostgreSQL, MongoDB, Snowflake
- Web Services: Azure, Jira

EXPERIENCE

REACT NATIVE DEVELOPER

Atlanta, GA

CircleK - TCS Client

September 2024 - Present

- Helped create Store Coach, using Nativewind, React Native 0.76, Redux Toolkit, and Axios, an application that helps manage and create tasks and assignments for employees and managers with a gamification appeal
- Led the efforts for user sign-in and logout, using Okta, to allow store employees and managers to access the application for a smooth and efficient login experience
- Delivered high-quality solutions Agile/Scrum methodologies and utilized Azure and Git for version control

REACT DEVELOPER

Atlanta, GA

Rite Aid - TCS Client

January 2024 - September 2024

- Helped design and create phase 2 of WFH (Work From Home), using Bootstrap5, React v18.4, Redux Toolkit, React Router, and Axios, an application that allowed Rite Aid Pharmacists to manage and create prescription scripts from their own homes
- Transcribed Java to React to recreate functionality from former version of application.
- Used Agile/Scrum methodologies to create and deliver quality work to the client
- Utilized Azure and Git as version control, along with code reviews for efficient code quality
- Integrated external APIs into the application to fetch data from remote servers.

REACT DEVELOPER

General Motors - TCS Client

Atlanta, GA

February 2023 - September 2023

- Refactored MDPI (Medium Duty Port Inventory), using Material UI, React v18.4, Redux Toolkit, React Router and Axios, a CRUD Application to help dealers and admins order vehicles for their dealerships from ports around the United States
- Created global state management using Redux Toolkit, to track purchases and order details of a user throughout the application
- Effectively used Agile/Scrum methodologies to create and deliver quality work to the client
- Utilized Azure and Git as version control, along with code reviews for efficient code quality

SOFTWARE ENGINEER

Honeywell Inc - TCS Client

Phoenix, AZ

September 2021 - January 2023

- Collaborated with team members in different time zones to manage and update over 50 Snowflake SQL views and tables per client specifications, using Snowflake and SQL
- Led the migration of Snowflake Enterprise SQL data of more than 10,000 vendors from one environment to another using Snowflake and SQL
- Used Bitbucket and Git for version control to manage client data, which increased overall team productivity
- Participated in daily scrum calls with both client and internal team

EDUCATION

BACHELOR'S OF SCIENCE IN COMPUTER SCIENCE

Georgia State University, GA

May 2021

MEAN STACK CERTIFICATION

Simplilearn Bootcamp, NC

Sep 2022
